About This Content

I got a call from New York. Lucky Luciano wanted my help in getting The Kid on his side. Piece of cake, he said. I wanted Luciano's connections in the Big Apple, so I agreed. What I didn't know was that The Kid didn't want to be on Luciano's side. That was how the trouble started. Piece of cake? I never did like cake.

Henry McCarty had the unremarkable childhood of a typical Texas farm boy. Henry was a hot-shot and a rascal and not so much fond of his father. When the old man lost the McCarty ranch to the bank, the young Henry finally rebelled and took off to seek his own fate.

In the next ten years Henry changed a handful of jobs. By the start of the War McCarty already had problems with local criminals and decided to abandon the state of Texas. Packing his arrogant temper, his disdainful attitude towards the spoiled city-boys and a pair of trusty revolvers, he headed to New York City. Fate finally smiled on him and he joined the gang of Lucky Luciano, becoming one of his most dangerous and resourceful men.

Book 2 of 3. Please send help, this book is terrible.

Similar mechanics to Book 1, but this time the story is tedious at best, and non-existent at worst. The whole story (and this isn't a spoiler DW) is set around a reality TV show, and the characters act completely contrary to rationality, and don't follow any character development from the previous book.

This is A BOOK, similar to the old R.L. Stine pick-a-choice books.

If discounted, get it only so you can progress to Book 3.. Just all around not a good game. I bought it on sale for \$2.50 a long time ago. Wish I could give it back and the few hours I spent on it. If you want this type of shooter, wait for Battlefield 3 or get Bad Company 2. Shame on you Frontlines for being so bad.. This game has 2 names.

Thumbs down!. SPOILER:

I thought this movie was awesome and here's why. The way that's it's produced or shot this movie is so 'raw'. You feel present in the moment. You can feel the stress, tension, the clock counting down but you can also feel the creativity, positive energy. I'm impressed by how professional everyone remained during a 48 hour game jam. Everyone got along and they remained good sports through the end. As a gamer and a game developer I felt like I was there. This is like a Cinderella story for game developers. I mean these guys got to pitch to the big dogs and they got contracts! What better outcome could any of us want... Congrats to those dudes!! Great movie. I highly recommend.

Spoiler: I do wish that PlayStation and Oculus would've allowed cameras in to watch the pitch but I understand why they didn't.. Absolutely fantastic game! From the second I started playing I was hooked. The writing is great, the pacing is terrific and the detail is engrossing. I've always enjoyed Choice of Games and I'm really happy that there's finally an assassin COG. There are a ton of options and different ways to play through the game, which I first got on my phone. I've now played it a second and third time. I keep discovering more and more. I like how you can really choose to be the kind of assassin you want to be. Definitely recommended.. i only bought this game because of rich evans and i wasn't disappointed. Unfortunately it's nothing like the original Life is Strange. Do yourself a favour and look for some other game to play.. Achievements: "COMBAT CAT" and "STREET CAT" seem unattainable. Thus, "COMBAT CAT"(all achievements unlocked) is also unattainable. While not necessarily broken, they require an unreasonable amount of kills in a single run(something that is not tracked!)

+Unique match-3 mechanics

+Upgrade system

+Cute art

+Addicting

+Cheap

=Retro aesthetic\music

-3 unattainable achievements

-Constant border on the edges

-Windowed mode does not get rid of the border

Honestly, it hurts me to not recommend this game. It's a really fun match-3-- er, y'know, 4. It has a cool swapping mechanic that I, personally, have not yet seen. The artstyle is cute. I love cats. It's a great game. If you don't care about achievements, I'd say go for it. It's a blast. The only major issue besides the achievements is that, even in a window, 2/3 of the playscreen is a large border. If the achievements were fixed, I'd definitely change this review.. Excellent unit addition in this DLC. HMS Victory and USS Constitution are my faves!. Its a very good game i recommend it, good, clean, not taking much space on my PC

Haven't picked up a MotoGP game since Namco made them and after everything i'd heard about Milestone i was a little sceptical going into this, but i'm pleasantly suprised.

Breaking feels good, the weight transfer from side to side feels "weighty." I have no actual idea if it's good simulation or not, i don't race bikes. Equally you'll know when the back starts to step out and you can have some fun being sideways out of corners. Not fast but it looks cool. All in all i found the riding physics really satisfying. I do play with "Normal." assists which is in the middle, so experiences will probably very depending on how hardcore you want it.

Graphics are just fine, nothing speciel, but they run smoothly and i've only got a 1050ti.

Atmosphere around the race weekend is authentic enough depending on whose coverage you watch i suppose. Career progression has been fun so far, there's just enough micro management to keep you engaged with upgrades and so on without it being time consuming. Minor gripe is you can't have a female rider, doesn't really detract from the game but it would be nice for those of us who are... well, female. ^_(_?)_/'

The AI, i don't know what to make of the AI as i think part of the problem might be my style because i'm too used to car games, but they seem to have ridiculous corner speed at times and often don't care if you're on the racing line or not. So if you break late and block pass on the apex of the corner expect the AI to come hurtling through anyway. Sometimes they race well, sometimes its incredibly frustrating. They do seem to crash a fair bit though, you'll frequently get the "Crashed." graphic pop up showing you which rider it was.

I suppose it depends what you want.

If you're into MotoGP and want a game then this is basically it i'd probably give it about 6 or 7/10. It's not perfect but it's all we have. If you like bikes but don't care about MotoGP so much probably a 5/10. If you just wan't a racing game then 3/10 cause i can see it being too frustrating.. Bounce a duck. Keep bouncing it. Eventually bounce two ducks. Eventually host a duck bouncing party.

10/10, totally what you'd expect of a "Bouncing Duck Simulator".. Use your brain, that's for sure.. Very good game even though it is from 2011. Great graphics and gameplay.. The best playable concept art I've ever seen.

Also only.. -Bought the main game and loved it so much.
-Decided to support the devs even more by buying the dlc
-Holy shiitake, that dlc is actually worth it?!
-Now I am wolverine
